Chegg Inc.

2019 - 2021

I solved advanced maths questions there.

SKILLS

NodeJs

MongoDB

Javascript

HTML & CSS

C++

Intermediate DSA coder

Basic ReactJs

Problem solving

MySQL

REST APIs

ExpressJs

PERSONAL PROJECTS

CRM Backend

- GitHub Link :- <https://github.com/aryanmaurya314/CRM-BACKEND.git>
- I build the backend of a CRM application using nodejs and mongoDB.
- This CRM app has ticket resource, user resource with all the CRUD APIs and is integrated with the notification service app.

Notification App Backend

- GitHub Link :- https://github.com/aryanmaurya314/notification_app.git
- I build the backend of a Notification application using nodejs and mongoDB.
- This app is used to send email notifications.

Job Portal Backend

- GitHub link :- <https://github.com/aryanmaurya314/JOB-PORTAL-BACKEND.git>
- This repository contains all the files to create a website like naukari.com. A person can search and apply for a job and a company can post a job also.

URL Shortener

- GitHub link :- <https://github.com/aryanmaurya314/URL-Shortener.git>
- This app uses express server to run and mongoDB database to store shortened link. It shrinks any large url link to 9 alphanumeric characters. It also stores and shows full link short link and number of clicks of provided link.

Portfolio Website

- GitHub link :- <https://github.com/aryanmaurya314/portfolio-js.git>
- I made this portfolio website using HTML, CSS & JavaScript.
- Demo link:- <https://aryanmaurya314.github.io/portfolio-js/>

Notes App

- GitHub link :- <https://github.com/aryanmaurya314/Magic-Notes.git>
- The UI of this app is built using bootstrap. A user can add, delete and read notes.
